

FULLY DIGITAL GLITCH FREE PLL

KEY FEATURES

- Ideal as a clock generator for digital design
- Excellent frequency jitter performance
- Ultra-low area fully digital PLL design
- Patented glitch free frequency adjustment
- Fine frequency precision with fractional divider
- Low implementation charges due to predictable digital design

DESCRIPTION

A programmable fully digital PLL (FDPLL) designed to lock to an incoming clock source and produce an output clock.

MULO, together with the *EXPO* value, represents a denormalized floating-point number, which is the generation frequency/reference frequency ratio.

The *EXPO* value is equal to the position of the binary point in the binary *MULO* code, counting from its least significant bits.

Moreover, $EXPO = 0$ corresponds to the position of the point to the right of the $MULO$ least significant bit, and $EXPO = 7$ corresponds to the position of the point to the right of the $MULO$ most significant bit, respectively.

$$F(CLKO) = K \cdot F(CLKR)$$

Coefficient K is associated with $MULO$ and $EXPO$ as follows:

$$K = \frac{MULO}{2^{EXPO}}$$

where the value $MULO = 0$ is forbidden

Based on this, the multiplier K in the formula can be in the range of values from 0.0078125 to 255 , setting both the frequency multiplication and division modes. You can use any of 2040 values of K .

PLL CHARACTERISTICS

Parameter	Unit	Min	Typ	Max	Comment
CLKR reference frequency	MHz	0.8		1000	
CLKO output frequency range	MHz	200		2000	
CLKD output frequency	MHz	3.125		1000	
CLKO jitter	%		1		CLKO=600 MHz
				2	CLKO=1000 MHz
CLKO output duty cycle	%	45	50	55	
Power consumption	mW		5		CLKO=1000 MHz
Operational voltage	V	0.8	0.9	1.0	Digital only
Total area	mm ²		0.012		
Operational temperature	°C	0	70	85	

PIN LIST

Signal	Direction	Comment
nRES	input	Asynchronous reset input (Active Low)
CLKR	input	Reference frequency input
MULO[7..0]	input	Multiplication factor mantissa input
EXPO[2..0]	input	Multiplication factor exponent input
DIVO[4..0]	input	Post-divider factor input
CLKO	output	Basic frequency output
CLKD	output	Post-divider output
LOCK	output	Capture indication output
